

Mackay HHS Obstetrics and Gynaecology Progress Update

Progress Update – 11 November 2022

Our updated webpage about the Obstetrics and Gynaecology implementation program is now live. Please click [here](#). It is now much easier to find information and you'll be able to access regular progress updates like this one as we move through the implementation of the independent investigation's recommendations. It's important to know that our progress updates will also be provided via email. We have included a subscriber function on the page so anyone that is interested in following our progress can sign up and receive these updates via email as well.

Our Mackay HHS Obstetrics and Gynaecology Implementation Working Group has already commenced meeting. The group is made up of consumers, doctors, midwives, nurses and executive. In addition to its work on the recommendations, the group is also reviewing all the issues and ideas raised at the Community Forum. The summary of these can be viewed [here](#).

As the Working Group progresses through the recommendations, there will be opportunities to provide feedback on the implementation of these. **These opportunities will be advertised via our website and email to enable you and other consumers to participate.** We look forward to working with you on implementing the recommendations.
